North Bay Engineer's Club (NBEC)

Professional Capabilities

Alan Mitchell has 30 years of diverse experience in providing design, project management, development services, and construction project delivery for Public Agencies. He has managed numerous capital projects through all phases, from programming through implementation and final acceptance. His experience includes management of both design and construction for buildings, civil infrastructure, wastewater treatment plants, parks, and rehabilitation of existing roadways and utilities. He has provided inspection services for civil infrastructure projects and has been Resident or Assistant Resident Engineer on several state and federally funded transportation projects.

Alan performed project management and development services review under the Contract City Engineering Services contract for Colfax. He has also performed development services engineering as an Engineer with the City of Sacramento, as a consultant serving as the Assistant City Engineer to the City of Colusa and continues to do so under the City Engineering Services contracts with the City of Winters. He has managed numerous land development projects through all phases: entitlements, final map, improvements plans, and construction.

With both land development and capital projects, he has dealt effectively with other Public Agency Departments, Managers, Developers, and Legislative Bodies. He has managed numerous projects, and has actively partnered with owners, architects, engineers, state and federal agencies, and contractors. He has been responsible for project personnel management, contract negotiations and oversight, fiscal control, and community liaison.

Pertinent Experience

- Ponticello Enterprises (1999-Current): Contract City Engineer providing project delivery, development services entitlements and plan checking, operations assistance, and construction management
- City of Woodland, Public Works, Engineer (1992-1999) - Administration and delivery of CIP
- City of Sacramento, Public Works, Engineer (1988-1992) – Checked plans in Development Services
