Professional Capabilities

Tom has over 35 years of construction and project management experience in capital infrastructure projects and private land development in the public sector. A recent addition to the PE Team, Tom has extensive experience with constructing and delivering infrastructure projects, including bridge and box culvert construction, potable and non-potable water systems, sanitary sewer system, storm drain collection systems with construction of various types of retention facilities. In addition, Tom has worked closely with developers and overseen private development projects later to be accepted by the local agency. He has also supervised inspections and soils laboratories for both private and public projects.

Tom has managed numerous capital projects including water, sewer, streets, parking garages, railroad track realignment, public buildings, treatment plants, street lighting, traffic signals, landscaping, and fleet facilities. He has a strong understanding of workplace safety, budgets, project schedules, quality of construction, and project delivery. Many of his projects have received multiple awards for construction and delivery from APWA and AWWA.

Pertinent Experience

- Ø Ponticello Enterprises (2018-Current): Project Engineer providing engineering administration, project delivery, operations assistance, development review and inspection, and construction management.
- Ø City of Fairfield, Construction Manager (2000-2020): Responsible for all private and public projects. Supervised the City's inspection team and soils laboratory. Managed all contracts and delivery of the projects for acceptance. Acted as the Labor Compliance Officer and was responsible for the General Storm Water Permit for the City. Performed plan checks, prepared project contracts and project specifications, and provided technical experience to other team members.
- Ø City of Fairfield, Public Works Manager (1993 -2000): Responsible for the Lighting and Landscape Maintenance Districts, Community Facility Districts and Geological Hazardous Assessments Districts. Prepared annexations, budgets and release contracts for maintenance as well as collect assessments.
- Ø City of Fairfield, Public Works Inspections (1985 -1993): Responsible for inspections of all public and private infrastructure. Performed residential inspections, tenant improvements, and inspection of public buildings.
